

# Model Electronic Railway Group

West of Scotland Area Group

Bulletin Apr 2019

## What's new

### Local website updates

The local MERG West of Scotland website now has its monthly updates added.

Three new 'Tips of the Month' are available. They are worth a look and can be found at

[www.wosag.org.uk](http://www.wosag.org.uk)

In addition, Neil has posted images from our Open Day last Sunday.

### Friday drop-in

Our fortnightly informal sessions in the 65 Club, 65 Main St, Prestwick have continued to be a success.

The next one is this Friday 29<sup>th</sup> March from 2pm to 4pm.

Contact me if you need directions.

Chic will be making up some Dupont cables, if you want to see how it is done.

As usual, if you have anything particular you want brought along, or anything you want to have tested, let me know by return.

Otherwise, you can just sit back with your coffee and discuss the topics of the day.

### Workshops

We intend organising a series of training sessions, as below:

- Kit Building & Soldering
- Basic Electronics
- Electronics 2
- Intro to PIC projects
- PICs2
- Intro to Arduinos

The dates and locations will depend on the numbers.

There are still places available on some of the sessions.

Enrolment sheets for each workshop were available at the Open Day.

If you want to be added to any of these lists, get back in touch.
