MERG TV Edit

MERG TV is a YouTube channel set up specifically by MERG. The MERG Committee has commissioned a number of instructional videos as well as videos demonstrating MERG kits and those related to Journal items. These will be 'Unlisted' within YouTube and therefore are not visible to the public at large unless they have the URL for any particular video. Such videos are a MERG Resource and we would ask you to respect this by not publishing the URL outside the MERG community. Edit
